

Beechwold Christian Church 2009 Worship Survey Results

The 2009 worship survey was distributed to the congregation on January 11, 2009. Church attendees were asked to complete the survey in the pews and return it upon leaving the service. 234 surveys were returned and responses represented the views of individuals of all ages. The goal of the survey was to assess the congregation's attitudes regarding the various elements of BCC's worship service. The results were consistently positive. Every element of worship received a "great" or "good" rating by more than 80 percent of the respondents.

Overall, 80% of the congregation reported likely to invited friends to BCC. The results suggest that excitement towards BCC tends to decrease with age and contentment tends to increase. Less than 8% of any age group reported feeling frustrated, disappointed, or embarrassed toward BCC worship.
