

A Letter about ICY and MNET...

To Alysen's supporting churches and individuals,

I just wanted to take a moment to write to you concerning Alysen and the exciting work she is undertaking here in the UK.

My wife and I had the privilege of first meeting Alysen earlier in the year at one of our training conferences. We have been in the UK for just over four years now, working with a local church youth ministry. We have also started walking through an exciting door God has opened to help set up a training program, called MNet, for emerging youth ministers.

This program allows a trainee to work towards a 3 year Bachelor of Theology Degree *while being placed in a local church ministering to young people!* Through this practical and real world experience, we hope to play a part in releasing a new generation of youth ministers here in the UK and beyond.

In talking to Alysen at the conference and in the months following, we soon discovered a similar heartbeat for young people, for youth ministry that multiplies disciples of Jesus, and for training emerging youth ministers. We are so pleased to learn from Alysen that she feels God calling her to stay in the UK to continue her ministry to young people and partner with us to train these emerging leaders!

We can see God using Alysen's heart, skills, and experience specifically to lead a cluster of trainees. This role will involve meeting weekly as a group for support and training, modeling and observing key ministry skills, and serving as a liaison between the church and trainee. We also can see God using Alysen to teach classes at conference, to help develop training methods and to develop more contacts with trainees and placement churches.

We are excited to partner with her and hope you all will continue to be involved in this vital ministry.

Sincerely,

Darin Stevens
